## Axis III: Patient Active Problem List:

SCHIZOAFFECTIVE DISORDER (295.70B)  
GERD (530.81A)  
NOT CURRENT SMOKER (V15.82C)  
DM 2 W DIABETIC HYPERLIPIDEMIA, MIXED (500537)  
ELEVATED TRANSAMINASE MEASUREMENT (790.4B)  
SCREENING FOR CA, COLON (V76.51A)  
CHOLELITHIASIS (574.20A)  
OBESITY (278.00E)  
DM 2, UNCONTROLLED (250.02B)  
DEFORMITY OF ANKLE OR FOOT, ACQUIRED (736.70A)

Axis IV: problems with primary support group

Axis V: Current GAF Score: 63

## Treatment Plan:

Discussed about medication compliance  
Also BHL if in crisis or ER or 911

Stable with the medication

## MEDICATION

Abilify 20 mg tab - take 1 tab po QHS for mood stabilization

Spoke with the pharmacist and discussed with the patient the recommendations to help with the high co-pay

Therapy  
Mindfulness Group with Mya

Pls continue to follow up with PCP regarding medical condition

Return for follow up on July 8, 2015 at 8:30 AM or sooner if needed

Tel # 323 298 3125

Time spent: 25 mins  
Greater than 50% of the time spent with the patient in counseling and/or coordination of care.

Acknowledged by: Hooks, Sarah Elizabeth (M.D.), M.D. on 06/23/15 0818

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.90	<=1.30 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	956

Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied

06/04/2015 - Released Future/Standing Orders in POPULATION CARE MANAGEMENT (continued)

Labs (continued)

by 1.21 if "Black" race is reported in Foundations System.

-GFR Ranges-

- GFR >89 Normal (or CKD1\*)
- 60-89 Mildly reduced (CKD2\*)
- 30-59 Moderately reduced (CKD3 if >3mos)
- 15-29 Severely reduced (CKD4 if >3mos)
- GFR <15 Kidney failure (CKD5 if >3mos)
- \* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	956

## Talag, Emelita Borja (M.D.), M.D. at 7/8/2015 0835

Author: Talag, Emelita Borja (M.D.), M.D.	Service: —	Author Type: Physician
Filed: 7/8/2015 10:02 AM	Encounter Date: 7/8/2015	Creation Time: 7/8/2015 8:35 AM
Status: Signed	Editor: Talag, Emelita Borja (M.D.), M.D. (Physician)	

## History:

7/8/2015

Lawson B Hawkins

000017508205

5/25/1955

Type of Visit: Medication Follow up

S: Patient came in for follow up; he continues to feel fine and stable; "my mood overall is good"; sometimes he cries but he said it is something within normal range; "I can manage and I feel it is normal to cry sometime"; sleep and appetite are good; still working on losing weight; he is doing the meditation; attends the group; mom and sister are stable in Italy; he feels Abilify has been helping him; denied mania, denied feeling hopeless nor helpless; has a job; likes what he is doing; he is working now with solar panel; no A/VH;" no suicidal thoughts nor homicidal thoughts"; he said his paranoia is still the same but not worse; "it is less"; he said he never act out; he feels much better when on medication. He was off from Abilify for about a month due to financial problem but now able to get the prescription for about \$10/month and he is pleased with it; No s/e from Abilify.

## Mental Status Exam:

Patient is a 60 y/o AAM who presented with casual attire with his old leather jacket; cooperative; no speech abnormalities, mood - he said he feels fine now, affect - bright, thought process revealed itself to be linear and goal directed, thought content - denied any SI/HI; Perception - denied any A/VH, denied delusion, ?paranoia, chronic and low level; no gross cognitive abnormalities noted, insight/J/IC - unimpaired

## DIAGNOSIS

Axis I: 295.70B SCHIZOAFFECTIVE DISORDER (primary encounter diagnosis)

Axis II: Deferred

Axis III: Patient Active Problem List:

SCHIZOAFFECTIVE DISORDER (295.70B)  
GERD (530.81A)  
NOT CURRENT SMOKER (V15.82C)  
DM 2 W DIABETIC HYPERLIPIDEMIA, MIXED (500537)

5/25/1955

Type of Visit: Medication Follow up

S: Patient came in for follow up; he continues to feel fine and stable; "my mood overall is good"; much less crying; "In general I feel heart broken, my family, my sister"; "My best friend, I don't know but her family has severe problems"; "She cries to me because her brother pushed her"; sleep and appetite are good; still working on losing weight; he is doing the meditation; attends the group; mom and sister are stable in Italy; he feels Abilify has been helping him; denied mania, denied feeling hopeless nor helpless; has a job; got a contract for a software; he likes what he is doing; no A/VH;" no suicidal thoughts nor homicidal thoughts"; he said his paranoia is still the same but not worse; "it is less"; he said he never act out; he feels much better when on medication. He was off again from Abilify for about a month due to financial problem but now able to get the prescription for about \$10/month and he is pleased with it; No s/e from Abilify. He said he was stable for that period w/o the Abilify but much better when on medication.

**Mental Status Exam:**

Patient is a 60 y/o AAM who presented with casual attire with his old leather jacket; cooperative; no speech abnormalities, mood - he said he feels fine now, affect - bright, thought process revealed itself to be linear and goal directed, thought content - denied any SI/HI; Perception - denied any A/VH, denied delusion, ?paranoia, chronic and low level; no gross cognitive abnormalities noted, insight/J/IC - unimpaired

**DIAGNOSIS**

Axis I: 295.70B SCHIZOAFFECTIVE DISORDER (primary encounter diagnosis)

Axis II: Deferred

Axis III: Patient Active Problem List:

SCHIZOAFFECTIVE DISORDER (295.70B)

GERD (530.81A)

NOT CURRENT SMOKER (V15.82C)

DM 2 W DIABETIC HYPERLIPIDEMIA, MIXED (500537)

ELEVATED TRANSAMINASE MEASUREMENT (790.4B)

SCREENING FOR CA, COLON (V76.51A)

CHOLELITHIASIS (574.20A)

OBESITY (278.00E)

DM 2, UNCONTROLLED (250.02B)

DEFORMITY OF ANKLE OR FOOT, ACQUIRED (736.70A)

Axis IV: problems with primary support group

Axis V: Current GAF Score: 63

**Treatment Plan:**

---

**Clinical Notes (continued)**

---

Stable with the medication

**MEDICATION**

Abilify 20 mg tab - take 1 tab po QHS for mood stabilization

LABS ordered for monitoring

Therapy  
Mindfulness Group with Mya  
Also doing the Tai-chi

Discussed about medication compliance  
Also BHL if in crisis or ER or 911

Return for follow up on Jan 6, 2016 at 8:30 AM or sooner if needed

Tel # 323 298 3125

Time spent: 25 mins  
Greater than 50% of the time spent with the patient in counseling and/or coordination of care.

**Components**

Component	Value	Reference Range	Flag	Lab
GLUCOSE, FASTING	81	70 - 99 mg/dL	—	956

Comment:

A repeatable fasting blood glucose result > 125 mg/dL is diagnostic of diabetes. A single such result can also be confirmed by, a 2 hr OGTT or random plasma glucose > or = 200 mg/dL, or a Hb A1c >6.4%. Patients with fasting blood sugar results between 100 and 125 mg/dL are at increased risk for future diabetes.

## Patient Instructions

**Your Kaiser Permanente Care Instructions****Body Mass Index: Care Instructions****Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

---

**12/29/2015 - Office Visit in INTERNAL MEDICINE RAIN2 (continued)**

---

**Patient Instructions (continued)**

---

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

**If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**Where can you learn more?**

Go to <http://www.kp.org>

Enter **S176** in the search box to learn more about "**Body Mass Index: Care Instructions.**"

---

**Clinical Notes (continued)**

---

Right shoulder pencil eraser lesion, indented slightly with scab like lesion that flakes off

Assessment and Plan:

1. Skin lesion- doubt cancer, will observe and follow up 1 week- if not improved then follow up derm advised

Health maintenance -counselled regarding exercise, diet, and safety. Preventative care discussed and counselled. Chart reviewed. Risks and benefits of therapies discussed.

The patient indicates understanding of these issues and agrees with the plan.

Advised to call back directly if there are further questions, or if these symptoms fail to improve as anticipated or worsen.

L98.9 SKIN LESION (primary encounter diagnosis)

E11.69, E78.2 DM 2 W DIABETIC HYPERLIPIDEMIA, MIXED

Z13.89 SCREENING FOR DIABETIC FOOT DISEASE, CATEGORY 0 - NORMAL DIABETIC FOOT

No orders of the defined types were placed in this encounter.

See patient instructions

MAKE A LIST OF ALL YOUR MEDICINES AND CARRY IT WITH YOU ALL TIMES

Do not smoke and if you do smoke be sure to call 1-888- 883- STOP

Labs and studies reviewed

patient advised that changes in condition or adverse outcomes were possible even with therapy, and that repeated checks and follow up are required

Diet, exercise and lifestyle modifications discussed. Patient demonstrates understanding of diagnosis, prognosis and treatment plan. Importance of follow up with tests ordered explained. Advised to call us promptly with any change of symptoms and to go to the ER for any emergency.

I have informed the patient of the rationale for each order placed today, and have answered all questions. I have stressed the fact that it is the responsibility of the patient to take all medications as prescribed, to complete all tests according to the time frame discussed, and make any follow up appointment as instructed. The patient knows how to leave a phone message for me and was encouraged to use the E Mail function of kp.org.

**Patient Instructions**

**Your Kaiser Permanente Care Instructions**

**Body Mass Index: Care Instructions**

**Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a

---

**Patient Instructions (continued)**

---

formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

### How can you care for yourself at home?

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

### If you have a BMI higher than 25

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

Resulted: 04/22/16 2025, Result status: Final result

Order status: Completed

Filed by: Interface, Scal\_Lab\_Cerner 04/22/16 2025

Collected by: Arroyo,Julio P 04/22/16 0802

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 583186713

Acknowledged by: Hooks, Sarah Elizabeth (M.D.), M.D. on 04/24/16 1434

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	0.87	<=1.30 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	956

Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

-GFR Ranges-

GFR >89 Normal (or CKD1\*)

60-89 Mildly reduced (CKD2\*)

30-59 Moderately reduced (CKD3 if >3mos)

15-29 Severely reduced (CKD4 if >3mos)

GFR <15 Kidney failure (CKD5 if >3mos)

\* GFR >60 is not diagnostic of CKD1 or 2

unless another marker of kidney damage is present (e.g. microalbumin or urine protein

>300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	956
------	-------	---	---	-----

Author: Talag, Emelita Borja (M.D.), M.D.

Filed: 4/13/2016 9:00 AM

Status: Signed

Service: —

Encounter Date: 4/13/2016

Editor: Talag, Emelita Borja (M.D.), M.D. (Physician)

Author Type: Physician

Creation Time: 4/13/2016 8:28 AM

## History:

4/13/2016

Lawson B Hawkins

000017508205

5/25/1955

Type of Visit: Medication Follow up

S: Patient came in for follow up; he continues to feel fine and stable; denied having any manic nor depressive episode; denied any A/VH; no delusion, has some paranoia - when he goes to the road he noticed tail lights flashing and then stop; neighbor stopped abruptly in front of him but he said he can manage those thoughts and no untoward incident nor outburst; still talks with her family in Europe; pleased with the Abilify; good sleep and appetite; maintaining good weight; his BS is much better; pleased with his stability; now taking the Abilify regularly; reads book; takes care of his customers; will try to work on solar panel; no SI/HI; no other concerns.

## Mental Status Exam:

Patient is a 60 y/o AAM who presented with casual attire with his brown leather jacket; cooperative; no

**04/13/2016 - OFFICE VISIT - MH/BH in PSYCHIATRY (continued)****Clinical Notes (continued)**

speech abnormalities, mood - he said he feels fine, affect - bright, thought process revealed itself to be linear and goal directed, thought content - denied any SI/HI; Perception - denied any A/VH, denied delusion, some paranoia (see above) ; no gross cognitive abnormalities noted, insight/J/IC - unimpaired

**DIAGNOSIS**

SCHIZOAFFECTIVE DISORDER (primary encounter diagnosis)

**AIMS SCALE****ABNORMAL INVOLUNTARY MOVEMENT SCALE**

0 = NONE

1= MINIMAL

2 = MILD

3 = MODERATE

4= SEVERE

- 1.- MUSCLE of facial expression ( forehead, eyebrows, periorbital area,cheeks.-frowning,blinking,smiling and grimacing) = 0
  - 2.- LIPS and PERIORAL AREA ( puckering,pouting, smacking) = 0
  - 3.- Jaw (biting,clenching,chewing,mouth opening,lateral movement) = 0
  - 4.- TONGUE ( increase in movement both in and out of mouth and not inability to sustain movement ) = 0
  - 5.- UPPER EXTREMITY ( choreic movements, athetoid movements = 0
  - 6.- LOWER( foot tapping,heel dropping,inversion, eversion of foot) = 0
  - 7.- NECK SHOULDERS AND HIP ( rocking twisting) = 0
  - 8.- SEVERITY OF ABNORMAL MOVEMENTS = 0
  - 9.- INCAPACITATION DUE TO ABNORMAL MOVEMENTS = 0
  - 10.- PT.'S AWARENESS OF ABNORMAL MOVEMENTS= 0
  - 11.- CURRENT PROBLEMS WITH TEETH AND / DENTURES = 0
  - 12.- DOES PATIENT NORMALLY WEAR DENTURES?
- TOTAL SCORES= 0

**Treatment Plan:**

Stable with the medication; no s/e reported

**MEDICATION**

Abilify 20 mg tab - take 1 tab po QHS for mood stabilization

**04/13/2016 - OFFICE VISIT - MH/BH in PSYCHIATRY (continued)**

**Clinical Notes (continued)**

Therapy  
Mindfulness Group with Mya  
Also doing the Tai-chi

Discussed about medication compliance  
Also BHL if in crisis or ER or 911

Fasting blood tests ordered

Return for follow up on July 20, 2016 at 8:30 AM or sooner if needed

Tel # 323 298 3125

Time spent: 25 mins  
Greater than 50% of the time spent with the patient in counseling and/or coordination of care.

GLUCOSE, FASTING	89	70 - 99 mg/dL	—	956

**04/13/2016 - OFFICE VISIT - MH/BH in PSYCHIATRY (continued)**

**Labs (continued)**

**Comment:**

A repeatable fasting blood glucose result > 125 mg/dL is diagnostic of diabetes. A single such result can also be confirmed by, a 2 hr OGTT or random plasma glucose > or = 200 mg/dL, or a Hb A1c >6.4%. Patients with fasting blood sugar results between 100 and 125 mg/dL are at increased risk for future diabetes.

Alert and oriented x3, No acute distress, Type 3 skin  
~7x7mm brown stuck on appearing papule with central atrophy

**08/18/2016 - Office Visit in DERMATOLOGY VENICE A 4TH FLOOR (continued)****Clinical Notes (continued)**

A/P: NEOPLASM OF UNCERTAIN BEHAVIOR (primary encounter diagnosis)

Note: on right shoulder, seborrheic keratosis but given atrophy, differential diagnosis includes atypical dermatofibroma.

Plan: SURGICAL PATHOLOGY

BIOPSY, SHAVE

Recommend biopsy today. Discussed risks which include but are not limited to pain, bleeding, infection, scar, dyspigmentation, recurrence, and need for further treatment. The patient/parent(s) is(are) in agreement with this plan.

- Oral consent was obtained from the patient and a photo was taken. The area was cleaned with alcohol wipes and anesthetized with 1mL of 1% lidocaine with 1:100,000 epinephrine. A dermablade was used to obtain a specimen. Given depth and atrophy, the resulting wound was deep, so 3 4-0 nylon sutures were placed. The specimen was placed in formalin and submitted to pathology for evaluation. Hemostasis was achieved with drysol. The wound was dressed with Aquaphor ointment and bandage. Wound care instructions reviewed given to patient; all questions answered. The patient tolerated procedure well without complication.

- Per patient preference, results will be communicated via phone.

**MICROSCOPIC DESCRIPTION**

A microscopic examination was performed.

**CLINICAL HISTORY**

CLINICAL HISTORY (REQUIRED): ~7x7mm brown stuck on appearing papule with central atrophy, seborrheic keratosis vs atypical dermatofibroma.

**GROSS DESCRIPTION**

The specimen is received in a formalin filled container with the patient's I.D.  
 The specimen consists of 2 shave biopsies of a tan skin with the smaller measuring 0.7 x 0.5 cm and the larger fragment measuring 1.0 x 0.9 cm. Both fragments are sectioned and the entire specimen is filtered. AE/1

MRN# 000017508205

Lawson B Hawkins  
 2626 S. Cochran Ave  
 Los Angeles CA 90016-2618

Dear Mr. Hawkins,

On behalf of your doctor I'm pleased to inform you that your diabetes labs are still good, work on weight and diet and exercise.

01/12/2017 - Released Future/Standing Orders in POPULATION CARE MANAGEMENT (continued)

Letters (continued)

Sincerely,

SHIRLEY IRMA BELTRAN LVN  
From the office of Hooks, Sarah Elizabeth (M.D.)

KP.ORG is a great way to access most of your lab test results, and to contact the office of your Primary Care Physician or another provider with whom you have had contact in the past 13 months.

Author: Talag, Emelita Borja (M.D.), M.D.  
 Filed: 2/3/2017 3:16 PM  
 Status: Signed

Service: —  
 Encounter Date: 2/3/2017  
 Editor: Talag, Emelita Borja (M.D.), M.D. (Physician)

Author Type: Physician  
 Creation Time: 2/3/2017 1:29 PM

**History:**

2/3/2017

Lawson B Hawkins

000017508205

5/25/1955

Type of Visit: Medication Follow up

S: Patient came in for follow up; he was last seen in April 2016; stable; mom passed away in August but he didn't go to Italy; he is able to deal with the loss; mom is old and patient felt that she led a good life; denied manic nor depressive episode; pleased with the Abilify; good sleep and appetite; maintaining good weight; his BS is much better; some paranoia but not worse; pleased with his stability; now taking the Abilify regularly; reads book; takes care of his customers; no SI/HI; no other concerns.

**Mental Status Exam:**

Patient is a 61 y/o AAM who presented with casual attire with his brown leather jacket; cooperative; no speech abnormalities, mood - he said he feels fine, affect - bright, thought process revealed itself to be linear and goal directed, thought content - denied any SI/HI; Perception - denied any A/VH, denied delusion, he reported some paranoia but not worse than before ; no gross cognitive abnormalities noted, insight/J/IC - unimpaired

**DIAGNOSIS**

SCHIZOAFFECTIVE DISORDER (primary encounter diagnosis)

**AIMS SCALE****ABNORMAL INVOLUNTARY MOVEMENT SCALE**

0 = NONE

1= MINIMAL

2 = MILD

3 = MODERATE

4= SEVERE

1.- MUSCLE of facial expression ( forehead, eyebrows, periorbital area,cheeks.-frowning,blinking,smiling and grimacing) = 0

2.- LIPS and PERIORAL AREA ( puckering,pouting, smacking) = 0

**02/03/2017 - OFFICE VISIT - MH/BH in PSYCHIATRY (continued)****Clinical Notes (continued)**

- 3.- Jaw (biting,clenching,chewing,mouth opening,lateral movement) = 0
  - 4.- TONGUE ( increase in movement both in and out of mouth and not inability to sustain movement ) = 0
  - 5.- UPPER EXTREMITY ( choreic movements, athetoid movements = 0
  - 6.- LOWER( foot tapping,heel dropping,inversion, eversion of foot) = 0
  - 7.- NECK SHOULDERS AND HIP ( rocking twisting) = 0
  - 8.- SEVERITY OF ABNORMAL MOVEMENTS = 0
  - 9.- INCAPACITATION DUE TO ABNORMAL MOVEMENTS = 0
  - 10.- PT.'S AWARENESS OF ABNORMAL MOVEMENTS= 0
  - 11.- CURRENT PROBLEMS WITH TEETH AND / DENTURES = 0
  - 12.- DOES PATIENT NORMALLY WEAR DENTURES?
- TOTAL SCORES= 0

## Treatment Plan:

Stable with the medication; no s/e reported

## MEDICATION

Abilify 20 mg tab - take 1 tab po QHS for mood stabilization

Therapy as needed

Fasting blood tests ordered

Return for follow up on June 12, 2017 at 2:00 PM or sooner if needed

Tel # 323 298 3125

Time spent: 25 mins

Greater than 50% of the time spent with the patient in counseling and/or coordination of care.

EMELITA BORJA TALAG MD

Acknowledged by

Talag, Emelita Borja (M.D.), M.D. on 03/15/17 1753

Hooks, Sarah Elizabeth (M.D.), M.D. on 03/16/17 0803

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	0.84	<=1.30 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	956

Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

-GFR Ranges-

GFR >89 Normal (or CKD1\*)

60-89 Mildly reduced (CKD2\*)

30-59 Moderately reduced (CKD3 if >3mos)

15-29 Severely reduced (CKD4 if >3mos)

GFR <15 Kidney failure (CKD5 if >3mos)

\* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	956
------	-------	---	---	-----

**Components**

Component	Value	Reference Range	Flag	Lab
GLUCOSE, FASTING	102	70 - 99 mg/dL	H ^	956

Comment:

A repeatable fasting blood glucose result > 125 mg/dL is diagnostic of diabetes. A single such result can also be confirmed by, a 2 hr OGTT or random plasma glucose > or = 200 mg/dL, or a Hb A1c >6.4%. Patients with fasting blood sugar results between 100 and 125 mg/dL are at increased risk for future diabetes.

Filed by: Interface, Scal\_Lab\_Cerner 03/14/17 1842

Collected by: Calpin, Kimberly A 03/14/17 0911

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 604606071

Acknowledged by: Hooks, Sarah Elizabeth (M.D.), M.D. on 03/15/17 0757

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	0.80	<=1.30 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	956

Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

-GFR Ranges-

GFR >89 Normal (or CKD1\*)

60-89 Mildly reduced (CKD2\*)

30-59 Moderately reduced (CKD3 if >3mos)

15-29 Severely reduced (CKD4 if >3mos)

GFR <15 Kidney failure (CKD5 if >3mos)

\* GFR >60 is not diagnostic of CKD1 or 2

unless another marker of kidney damage is present (e.g. microalbumin or urine protein

>300 mg/day on 2 occasions, or renal

biopsy or imaging abnormality).

RACE	Black	—	—	956
